The Problem

The Balkan property market is large — and completely broken

Fragmented across 10 countries

Dozens of local portals, different languages and formats — no unified experience.

Language barriers lock out buyers

Cross-border search is nearly impossible for foreign buyers.

No trust, no verification

No way to verify agents. Fraud is a common pain point across the region.

Outdated, slow platforms

Existing portals run on old tech — poor mobile, no real-time tools, no intelligence.

Year 1 — subscriptions + promoted listings

Why now?

Post-pandemic price surge

Property prices rose 8–15% YoY in 2023–24, driving buyer urgency.

Foreign buyer boom

EU, UK, and Gulf buyers increasingly targeting Montenegro, Albania, and Croatia.

Digital-first generation

Millennials entering prime buying age expect a modern, mobile-first experience.

No dominant regional player

Unlike Western Europe, no Rightmove-equivalent has emerged in SEE.
